Guide to Plant Vouchers

What are Plant Vouchers?

Tulo Valley Nursery and the Department of Environmental Parks have an established “Plant Voucher Program” for residential development subject to planning approval. The Plant Voucher Program permits the applicant to purchase plants from Tulo Valley Nursery at a discounted price. The Department of Planning in conjunction with the Department of Parks may issue plant vouchers more widely.

How do I Obtain Plant Vouchers?

Plant vouchers may be issued to all approved residential development on undeveloped properties which will include residential development that;

- a) increases the existing site coverage of vegetation by 50% or more;
- b) involves major landscaping and excavation cuts;
- c) requires construction of major retaining walls with planters and / or terraced landscaping.

It is desirable to use the Plant Voucher Program to provide opportunities for additional planting in residential areas. The use of native and endemic species shall be encouraged.
